*The Profits being appropriated at the end of every Five Years, either in increase of the Sum Assured, or as an immediate Cash payment. At the last division made to the 31st December, 1865, the Cash Bonus amounted to more than 28 per cent. of the Premiums paid during the quinquennial period, the corresponding Reversionary Bonus averaging nearly two per cent. per annum on the Sum Assured.*

The NEW BUSINESS of 1867 comprised insurances for £357,031; and the Premiums received thereon amounted to £11,137. 13s. 6d.

The Total INCOME of 1867 was £113,770, and the available ASSETS at the end of the year were £626,857.

The EXPENSES OF MANAGEMENT now amount to only *Four per Cent.* on the Income.

The PREMIUMS are calculated for every half year of age.

The realized PROFITS are ascertained every Five Years; and NINE-TENTHS of the whole are divided among the Assured. As considerably more than one-tenth of the Profits is derived from Policies which do not Participate in the Profits, it will be seen that *the Assured have greater advantages in this Society than if they formed a Mutual Insurance Company*, dividing among themselves the whole of the Profits derived from their own Policies.

The following TABLE shows the *Total Additions to Policies of £1000 each, to 31st December, 1864* :—

Age at Entry.	NUMBER OF PREMIUMS PAID.
